INSPIRATION

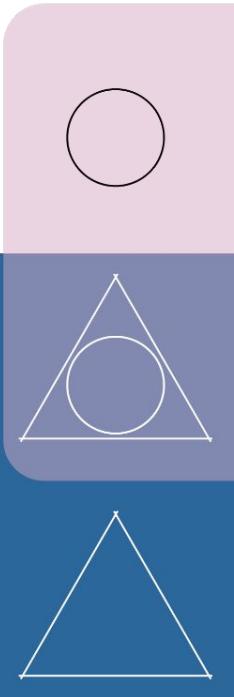

CONCEPT: SYMBIOSIS

Manhattan, Skyscrapers and crowds everywhere, what can make people feels impetuous, efficient and sharp. Also, the owner is sharp, she came to U.S. when she was 9 years old. And now she has a 15,000 sf office in Manhattan, she is talent, clever and sharp.

SHARP

SOFT

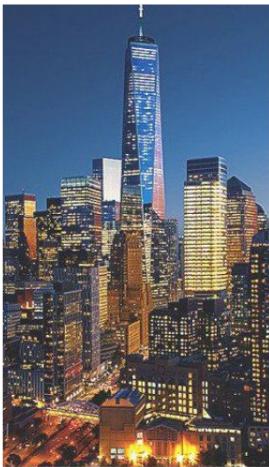

Makeup

The Central park is the only green island of Manhattan, and it softens the sharp city. Talking about the cosmetic, soft is always one of most important characteristics.

My concept is **SYMBIOSIS of sharp and soft**. That also could apply to people and company, being sharp on outside to face the challenge, innovation and overcome difficulties; At the same time, keep your heart soft so that you can not forget your original intention and not lose yourself.

COLORS APPLICATION

How can I get the **SALES** department ?

Go straight and you will see the **GREEN** area on the left. That's the Sales department.

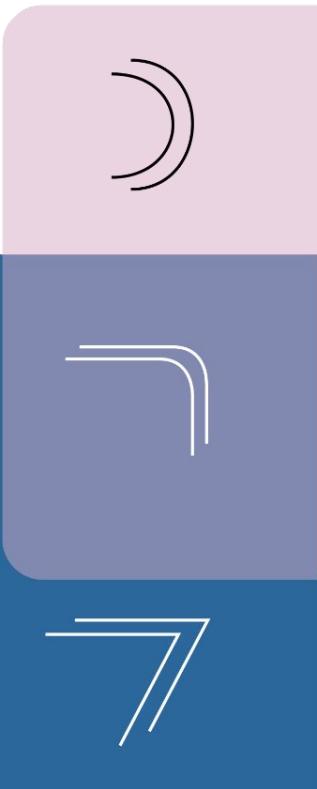

CONCEPT APPLICATION

In today's society, there is always a gap between people. Urban planning and design cut off opportunities for people to communicate, and architecture does not provide a place where people want to communicate... Society and life lose their intimacy, and thus lose their color.

SHARP

Working alone

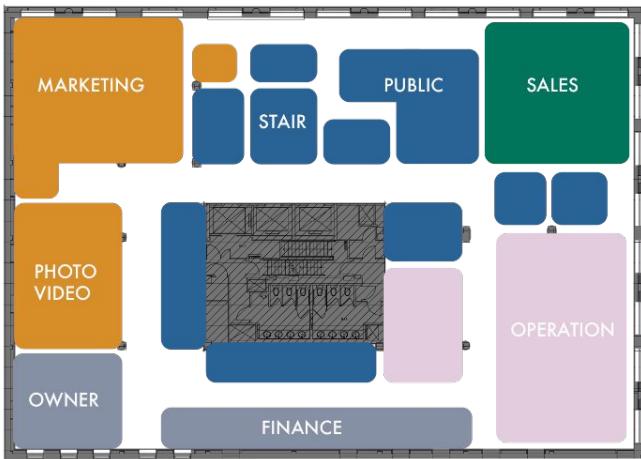

Human touch

I want to break the indifference between urban and architectural, **break boundaries between privacy and public areas**, realize the interaction between communication and space, and **bring the colors back to our daily life**.

STEELCASE FURNITURE

THE MORE SOFT EXPERIENCE

No walls block the north side windows, everyone in the company will enjoy the view

Eight small meeting rooms are distributed in various departments, people can get to it as soon as they want

Secondary stairs makes people more convenient and privately to reach 8th floor (Relaxation Room)

There are four signpost pointing the directions of departments
